

How to get body measurements?

Measure your chest / bust, waist, sleeves length and back length as per below illustrations. Once you get all measurements, match your measurements with above **Adult Body Size Chart**. If your body measurements fall under M, you should order a medium size jacket. Feel free to [contact us](#) if you have any question.

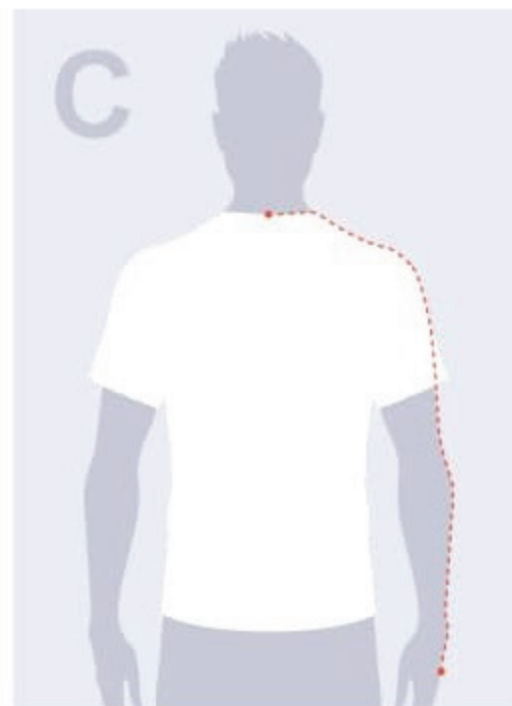

A: CHEST (CIRCUMFERENCE)

Measure around the fullest part of chest / bust just below your armpits

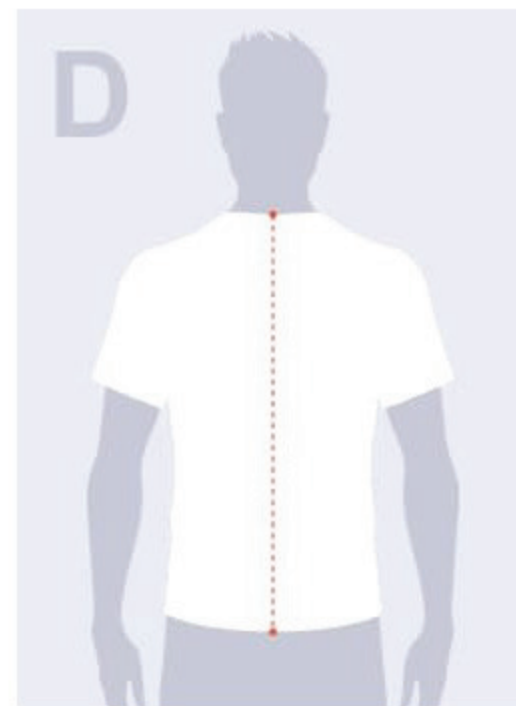

B: WAIST (CIRCUMFERENCE)

Measure round your waistline, where your trousers would button up.

C: SLEEVE LENGTH

Measure your sleeve with slightly bent, from the shoulder bone to back of your wrist.

D: BACK LENGTH

From collar seam to the end of waistband or where you want to end the jacket.
